

We're HIRING! JOIN OUR TEAM

SOFTWARE DEVELOPER

 **Rwanda**

We are seeking a talented and experienced Full-Stack Developer (or Software Engineer) to join our growing team.

You will play a key role in designing, developing, and maintaining our systems, ensuring exceptional user experiences and a robust technical foundation.

- Bachelor's degree in Computer Science, Software Engineering, or a related field, or equivalent experience.
- Solid experience working with ASP.NET Core and a strong understanding of MVC and Web API principles.
- In-depth knowledge of database systems, including relational (MySQL, Oracle) and non-relational (MongoDB) solutions.
- Proficiency in object-oriented design (OOD) principles and development methodologies.
- Exceptional problem-solving, debugging, and troubleshooting skills. The ability to thrive in both independent and collaborative work environments.
- Strong foundation in JavaScript/TypeScript, with expertise in DOM manipulation and the JavaScript object model.
- Deep understanding of React.js and its core functionalities.
- Experience with popular React.js workflow management tools (Redux, MobX a plus).
- Familiarity with containerization technologies like Docker and Kubernetes (highly desirable).
- Experience with CI/CD tools and practices preferred.
