Reporting to the Chief Risk Officer, the position is responsible for establishing, implementing and enforcing a robust risk management framework and systems (policies, processes and tools) covering credit, operational, strategic, liquidity, foreign exchange and interest rate risk.

THE ROLE

- Provide co-ordination and guidance of the bank's risk management activities.
- Develop risk management policies, including the quantification of the Bank's risk appetite through specific risk limits, in line with the Bank's business plans and strategies.
- Develop the analytical, systems and data management capabilities to support the risk management function and facilitate production of quality management and regulatory reports;
- Establish a risk management culture that promotes good analysis, judgment, flexibility and balance between risk and reward
- Ensure that processes exist for the identification, classification and management of key risks facing the bank.
- Monitor, analyses and develop risk profiles of new areas of activities and ensure that they conform to regulatory requirements
- Develop and maintain the Banks Enterprise Risk Management Framework for all aspects of risks across the bank and ensure its effective implementation.
- Develop the Enterprise Risk function to ensure it is capable of supporting first Line of defense risk taking activities through effective second line challenge.
- Recommend appropriate risk appetite aligned with strategic objectives and ensure the Board approved Risk appetite is integrated into the overall strategic agenda.
- Develop adequate risk infrastructure to support strategy and operational activities.
- Implement risk data aggregation capability to support seamless risk analysis and report.
- Initiate a relevant stress test and scenario program, review the results and assess their implications for the Bank.
