

WE'RE HIRING

FULL-STACK DEVELOPER

We are seeking a talented and experienced Full-Stack Developer (or Software Engineer) to join our growing team. You will play a key role in designing, developing, and maintaining our systems, ensuring exceptional user experiences and a robust technical foundation.

- **Education:** Bachelor's degree in Computer Science, Software Engineering, or a related field, or equivalent experience
- **Technical Expertise:** Experience with ASPNET Core, MVC, Web API, JavaScript/TypeScript, Reactjs, and tools like Redux and MobX, Docker, Kubernetes, and CI/CD practices.
- **Database Management:** Possess a strong understanding of relational (MySQL, Oracle) and non-relational (MongoDB) database systems for data storage and retrieval. Ensure efficient data handling and storage practices
- **Collaboration and Translation:** Work closely with architects, designers, and other stakeholders to translate design concepts into functional, maintainable features. Continuously improve existing codebases for optimal performance and adherence to best practices.
- **Troubleshooting and Problem-Solving:** Effectively troubleshoot and resolve production issues, ensuring application stability and uptime. Demonstrate exceptional problem-solving, debugging, and troubleshooting skills.

DEADLINE:
08 AUG 2024
